The program will include lectures by nationally and internationally recognized experts, followed by interactive panel discussions. A wide array of topics will be discussed including the pathophysiology of IBD, pharmacologic therapies and surgical interventions. Participants will receive a comprehensive overview of the latest available research and clinical information on evaluation and management of patients with IBD.	\$12,000.00
National Kidney Foundation	NKF 2017 Spring Clinical Meeting	An important objective of SCM17 is to present the latest insights into chronic kidney disease care. Participants will learn about new and evolving concepts related to kidney disease through a carefully designed combination of interesting courses, practical workshops, thought-provoking symposia and insightful debates incorporating the latest developments in clinical nephrology.	\$10,000.00

2017 CONTINUING MEDICAL EDUCATION GRANTS

Name of Recipient	Program Name	Program Description	Amount
Washington University	Nephrology Update for the Primary Care Provider	This live activity is designed for primary care physicians including health care professionals, physicians in training, pharmacists, nephrologists, nurses and nurse practitioners who are involved in the care of patients with kidney disease. The result of this activity is increased knowledge, competence, performance and improved patient care.	\$3,000.00
Medstar Georgetown University Hospital	IBD & Other Inflammatory Pathologies of the GI Tract	The purpose of this symposium is to provide up to date information on the pathogenesis of diseases process, as well as evidence based recommendations on the management and monitoring of IBD and other inflammatory and auto-immune disorders. Through this course, the gap between state of the art practice and current practices will be closed in order to provide a high quality, comprehensive, multidisciplinary approach to patients with IBD. This approach will improve the quality of care provided to patients, decrease the risk of complications and morbidity, and reduce the overall burden of IBD on the patient and society.	\$5,000.00
American Health Resources, Inc.	Pharmacist's Guide to Managing Anemia in CKD	This activity is designed to educate pharmacists on the medication management of anemia in chronic kidney disease.	\$8,000.00

2017 CONTINUING MEDICAL EDUCATION GRANTS

Name of Recipient	Program Name	Program Description	Amount
Purdue Univ/Gi Health	Mechanistic Approaches to IBD: Current & Future Mgmt Strategies	This is a joint-providership of Purdue University College of Pharmacy and the University's School of Nursing, along with the GiHealth Foundation to present a multi-supported 2016-2017 National IBD Educational Initiative. The proposed initiative will inform and update community health care professionals on the latest developments in the management of patients with IBD by means of an alliance (mentorship) series that will highlight the most recent advances in the field. The initiative's live events will be complemented by the educational portal, www.gihealthfoundation.org	\$299,405.00
UCLA Medicine	7th Congress of the International BioIron Congress	The international BioIron Society (IBIS) is a global organization of scientists and clinicians dedicated to further the understanding of the fundamental biology of iron, and clinical conditions associated with abnormal iron homeostasis. Every two years the Society convenes an International Congress known as BioIron to provide a forum for investigators from around the globe to present their latest findings.	\$15,000.00
Purdue Univ/Gi Health	Improving IBD Care: A Personalized Approach to Management	Satellite symposium to be presented at the AIBD 2017 in Orlando, FL. This will be part of the 2017 National Symposia Series. This presentation can be accessed thru the educational portal: www.gihealthfoundation.org	\$132,381.00

2017 CONTINUING MEDICAL EDUCATION GRANTS

Name of Recipient	Program Name	Program Description	Amount
